## Subject Index

- Annular reactors**  
a simple method for the solution of mathematical models of annular reactors, 57
- Autoxidation**  
homogeneous catalyzed autoxidation of car-3-ene, 153
- Axial dispersion**  
influence de la distribution du liquide sur le coefficient de dispersion axiale en fluidisation liquide-solide, 69
- Bio-oxidation**  
bio-oxidation of inhibitory substrate in a continuous stirred tank biochemical reactor, B17
- Blood**  
effects of blood contact on the properties of tubular dialysis membranes, B1  
effects of temperature and concentration polarization on water vapour permeability for blood in membrane distillation, B33
- Carbon**  
basic dye adsorption on carbon using a solid-phase diffusion model, 23
- Carbon dioxide**  
solubility of methane, ethane, and carbon dioxide in a Mobil Fischer-Tropsch wax and in *n*-paraffins, 41
- Car-3-ene**  
homogeneous catalyzed autoxidation of car-3-ene, 153
- Catalytic cracking units**  
evaluation of the hydrodynamic conditions in multistaged fluidized countercurrent flow reactors in pilot and semicommercial catalytic cracking units, 97
- Convective mass transfer**  
an exact solution to a convective mass transfer laminar flow model for determination of intestinal wall permeabilities, B29
- Countercurrent flow reactors**  
evaluation of the hydrodynamic conditions in multistaged fluidized countercurrent flow reactors in pilot and semicommercial catalytic cracking units, 97
- Distribution of liquid**  
influence de la distribution du liquide sur le coefficient de dispersion axiale en fluidisation liquide-solide, 69
- Dye adsorption**  
basic dye adsorption on carbon using a solid-phase diffusion model, 23
- Ethane**  
solubility of methane, ethane, and carbon dioxide in a Mobil Fischer-Tropsch wax and in *n*-paraffins, 41
- Extraction of metals**  
a semiempirical equilibrium model for the extraction of metals in acid media by neutral, acidic and basic solvents, 137
- Filtration**  
settling and filtration characteristics of manganese nodule leach slurry, 143
- Fixed-bed catalytic reactors**  
on the optimization of tubular fixed-bed catalytic reactors, 9
- Fluidization**  
influence de la distribution du liquide sur le coefficient de dispersion axiale en fluidisation liquide-solide, 69
- Gas absorption**  
interfacial resistance in exothermic gas absorption with chemical reaction, 187
- Gas holdup**  
gas holdup in pneumatic reactors, 149
- Heat-integrated distillation systems**  
a heuristic method for the synthesis of heat-integrated distillation systems, 161
- Heat transfer**  
a collocational approach to laminar flow heat transfer in non-newtonian fluids, 1  
hydrodynamic characteristics and heat transfer characteristics of liquid-solid suspensions in horizontal turbulent pipe flow, 111
- Heavy component and fraction properties**  
heavy component and fraction properties at low reduced temperatures for petroleum mixtures, 195
- Heuristic**  
a heuristic method for the synthesis of heat-integrated distillation systems, 161
- Horizontal turbulent pipe flow**  
hydrodynamic characteristics and heat transfer characteristics of liquid-solid suspensions in horizontal turbulent pipe flow, 111
- Hydrodynamic characteristics**  
hydrodynamic characteristics and heat transfer characteristics of liquid-solid suspensions in horizontal turbulent pipe flow, 111
- Hydrodynamic conditions**  
evaluation of the hydrodynamic conditions in multistaged fluidized countercurrent flow reactors in pilot and semicommercial catalytic cracking units, 97
- Interfacial kinetics**  
a rapid equilibrium approach to the interfacial kinetics of lipid hydrolysis by a candidal lipase, B7

- Interfacial resistance
  - interfacial resistance in exothermic gas absorption with chemical reaction, 187
- Intestinal wall permeabilities
  - an exact solution to a convective mass transfer laminar flow model for determination of intestinal wall permeabilities, B29
- Laminar flow
  - an exact solution to a convective mass transfer laminar flow model for determination of intestinal wall permeabilities, B29
- Leach slurry
  - settling and filtration characteristics of manganese nodule leach slurry, 143
- Lipid hydrolysis
  - a rapid equilibrium approach to the interfacial kinetics of lipid hydrolysis by a candidal lipase, B7
- Manganese nodule
  - settling and filtration characteristics of manganese nodule leach slurry, 143
- Mass transfer
  - fluid-solid mass transfer in a supercritical fluid extractor, 17
  - liquid-solid mass transfer in a packed bed with downward cocurrent gas-liquid flow: an organic liquid phase with high Schmidt number, 47
- Membrane distillation
  - effects of temperature and concentration polarization on water vapour permeability for blood in membrane distillation, B33
- Methane
  - solubility of methane, ethane, and carbon dioxide in a Mobil Fischer-Tropsch wax and in *n*-paraffins, 41
- Mobil Fischer-Tropsch wax
  - solubility of methane, ethane, and carbon dioxide in a Mobil Fischer-Tropsch wax and in *n*-paraffins, 41
- Non-newtonian fluids
  - a collocational approach to laminar flow heat transfer in non-newtonian fluids, 1
- Packed bed
  - liquid-solid mass transfer in a packed bed with downward cocurrent gas-liquid flow: an organic liquid phase with high Schmidt number, 47
- n*-Paraffins
  - solubility of methane, ethane, and carbon dioxide in a Mobil Fischer-Tropsch wax and in *n*-paraffins, 41
- Petroleum
  - generalized kinematic viscosity-temperature correlation for undefined petroleum fractions, 123
  - heavy component and fraction properties at low reduced temperatures for petroleum mixtures, 195
- Pneumatic reactors
  - gas holdup in pneumatic reactors, 149
- Radial chromatography
  - mathematical models of radial chromatography, 179
- Settling
  - settling and filtration characteristics of manganese nodule leach slurry, 143
- Solid-phase diffusion
  - basic dye adsorption on carbon using a solid-phase diffusion model, 23
- Solubility
  - solubility of methane, ethane, and carbon dioxide in a Mobil Fischer-Tropsch wax and in *n*-paraffins, 41
- Spiral-wound modules
  - an improved analytical method for the design of spiral-wound modules, 33
- Supercritical fluid extractor
  - fluid-solid mass transfer in a supercritical fluid extractor, 17
- Surface tensions
  - correlation and prediction of the surface tensions of mixtures, 205
- Three-phase sparged reactor
  - modelling of three-phase sparged reactor: non-uniform solid concentration profile, 81
- Tubular dialysis membranes
  - effects of blood contact on the properties of tubular dialysis membranes, B1
- Viscosity-temperature correlation
  - generalized kinematic viscosity-temperature correlation for undefined petroleum fractions, 123
- Water vapour permeability
  - effects of temperature and concentration polarization on water vapour permeability for blood in membrane distillation, B33
